## Projects

### Volume Booster

GameChief

Tools: Android Studio , Java , Xml

The volume booster app enhances the sound output of Android devices, allowing users to amplify media, notifications, and call volumes beyond the default system limits. Built in Java, it provides a clean and user-friendly interface for controlling sound levels. The app includes safety features to prevent potential damage to speakers

### Retwho

Aizaf

Tools: Flutter, Dart , Android App, IOS App

### Retwho App

Retwho is a B2B platform connecting wholesalers and retailers, streamlining the buying and selling of physical goods. We ensure a secure, efficient marketplace for thriving businesses through transparent and trusted transactions.
